LINING-OUT STOCK

We are certainly proud of our Lining Out Stock and believe you will be pleased with it also. Our sales last season were the best we have ever had and sold out of some varieties early in the season. We are offering several new items this season and nearly twice as many plants as we had to offer last season; some varieties we can furnish several thousands of while of others our stock is small. Nearly all of this stock has been one or more times transplanted. That which has not been is designated by the letter S which signifies that it is a seedling.

Practically all our Lining Out stock is grown under overhead irrigation. It would have been almost impossible to carry it alive through the drouth of the past summer. We kept our pumps going day and night and as a result we have the finest lot of Lining Out stock that we have ever grown.

We have a good many items which we do not have sufficient stock of to offer this season but if you can visit us you might find just the ones that you are anxious to secure, so come and select the stock while here. See it for yourself.

We know our stock is nice and believe our prices are reasonable. We shall try to furnish you a little better than you expected to get, if you will let us have your order.

Come if you can but if you cannot come send us your order. We will do our best to please you.

Prices are by the 100 but on many items our thousand rates will be less.

The Weather

The past season has been a hard one on nursery stock in nearly all sections of the country on account of the extreme dry weather. We were fortunate in having overhead irrigation with plenty of water from driven wells for all our lining-out stock, which consists of around six acres in frames and beds, as a result we never had nicer lining-out stock than we now have to offer. We were not so fortunate with our specimen stock. However the greatest loss was in not getting the desired growth, but by cultivation every week to ten days we kept a dust mulch and with the few rains we did have we came through the season pretty well.

Come and see our stock. If you cannot come, send us your order and we know it will please you. It must. If it is not right we make it right.

Let $100 Earn $1,000

We believe $100 spent in our lining-out stock will increase in value from $1,000 to $1,500 in three years. The increase should be practically the same whether you invest a less or greater amount. By growing the stock yourself you have it on hand so you can let your customers see just what they are buying and you save the freight and packing charges. We will gladly help you make the best selections.
